## ExcelNano™ NF-2

### Nanofiltration Membranes

SnowPure's **ExcelNano™** process NF membranes are uniquely designed for special industrial process separations. Based on 2-layer chemistry, the thin-film PA microscopic surface is tough and highly selective. These proprietary aromatic membranes are a selective-rejection chemistry, and are available only from SnowPure.

**2-Layer ExcelNano™** membranes can be used to separate:

- ◆ Divalent ions from monovalent ions
  - ◆ Sulfate from brine
  - ◆ Hardness from brine
  - ◆ Metals from water and brine
  - ◆ Organics from water and brine

**ExcelNano™** NF membranes are available in spiral-wound or flat-sheet form.
